
PRESS RELEASE

London, 11.30 23 January 2025

The World Platinum Investment Council announces Bravo Mining Corp. as its first pre-production member

The World Platinum Investment Council - WPIC® - today announces Bravo Mining Corp. (Bravo) as its inaugural pre-production member. This new membership category is specifically for companies involved in the development of orebodies that have the potential to produce platinum in the future. The membership broadens support for the implementation of WPIC's strategy to increase investment in platinum.

Bravo is a Canada and Brazil-based mineral exploration and development company, listed on the Toronto Stock Exchange (TSX.V:BRVO, OTCX:BRVMF). It is focused on the exploration and potential development of the Luanga Project, a platinum group metals ("PGM"), gold and nickel project located in the Carajás Mineral Province Pará State, Brazil.

This year the platinum market is forecast to record its third successive annual deficit as demand continues to exceed supply, with further deficits expected for the foreseeable future. WPIC expects that a significant increase in platinum supply will be needed during the 2030s to support hydrogen's growing role in global decarbonisation.

Trevor Raymond, CEO of the World Platinum Investment Council, commented: "We are delighted to welcome Bravo to WPIC as our first pre-production member. This new category of membership will enable more platinum advocates to distribute quality platinum insights to a wider global investment community. This will in turn enhance WPIC's effectiveness in increasing awareness, understanding and ownership of platinum as an investment."

"Being the first pre-production platinum group metals (PGM) company to join the prestigious WPIC is a testament to Bravo's achievements with its Luanga PGM+Au+Ni Project," said Luis Azevedo, Chairman and CEO of Bravo. "Membership provides Bravo with the opportunity to stay aligned with developments in the PGM sector, gain access to valuable market intelligence, and engage with the global PGM sector, both downstream and upstream. It also presents an opportunity for Bravo to raise awareness of the Luanga Project qualities and its strategic location. I extend my sincere gratitude to the WPIC Board and team for welcoming us as a member, and I look forward to engaging in constructive discussions that will benefit the industry and Bravo alike".

WPIC's London offices are located at: World Platinum Investment Council, Foxglove House, 166 Piccadilly, London, W1J 9EF

WPIC's Shanghai offices are located at: World Platinum Investment Council, Unit 1612, Shui On Plaza, No. 333 Middle Huaihai Road, Huangpu District, Shanghai, P.R.China

About Bravo Mining Corp.

Bravo is a Canadian and Brazil-based mineral exploration and development company focused on advancing its PGM+Au+Ni Luanga Project, as well as our Cu-Au exploration opportunities in the world-class Carajás Mineral Province, Para State, Brazil.

Bravo is one of the most active explorers in Carajás. The team, comprising of local and international geologists, has a proven track record of PGM, nickel, and copper discoveries in the region. They have successfully taken a past IOCG greenfield project from discovery to development and production in the Carajás.

The Luanga Project is situated on mature freehold farming land and benefits from being located close to operating mines and a mining-experienced workforce, with excellent access and proximity to existing infrastructure, including road, rail, ports, and hydroelectric grid power. A fully funded +70,000 infill, step out and exploration drilling and trenching program was completed in 2024. Bravo's current Environmental, Social and Governance activities includes planting more than 30,000 high-value trees in and around the project area, while hiring and contracting locally.

About Shanghai Platinum Week

Shanghai Platinum Week (SPW) is a premier annual event dedicated to the platinum group metals (PGMs) industry. Co-organised by the World Platinum Investment Council (WPIC), China Gold Association Platinum Committee, and the Precious Metals Industrial Committee of the China Material Recycling Association, SPW serves as a vital platform for industry leaders, experts, and stakeholders to discuss trends, innovations, and future directions. The event features a series of keynote speeches, seminars, exhibitions, and corporate events, with the China PGMs Market Summit being the central highlight. Since its inception, SPW has grown to become a significant gathering for fostering international engagement and communication within the PGM market.

SPW 2024 welcomed more than 500 attendees from over 300 organisations, with online viewership reaching 455K on the first day and 317K on the second day, far exceeding any previous year.

About Platinum

Platinum is one of the rarest metals in the world with distinctive qualities making it highly valued across a number of diverse demand segments. Platinum's unique physical and catalytic properties have established its value in industrial applications. At the same time, its unique precious metal attributes have made it the premier jewellery metal.

Platinum's supply comes from two main sources: primary mining output and recycling, which typically comes from end-of-life auto catalysts and jewellery recycling. Over the last five years, between 72% and 78% of total annual platinum supply (in refined ounces) has come from primary mining output.

Global demand for platinum is robust and becoming more diverse. There are four core segments of platinum demand: automotive, industrial, jewellery and investment demand.

Platinum demand from autocatalysts has equated to between 30% and 44% of total demand in the last five years. Platinum's diverse non-automotive industrial uses account on average for 32% of total global demand (five-year average). Over the same period, global annual jewellery demand has averaged 26% of total platinum demand. Investment demand is the most variable category over the past five years, ranging between -10% and 20% of total demand (excluding movements in unpublished vaulted investor holdings).
